

## AEROBIC INTERVALS

**Description:** Short, medium and longer aerobic intervals

**Rationale:** Use this session for helping riders to build confidence at different intensities and improve aerobic capacity.

**Teaching notes:**

- Use either heartrate or RPE, but also remember to describe how each challenge should feel in the legs.
- Remember to coach power first, then cadence. There's little benefit in having the right cadence and not enough power.

### WARM UP

10mins

### PYRAMIDS

\*After each interval, add a recovery of the same length of time  
- eg 15 sec interval is followed by 15 sec recovery.

**INTERVAL**  
10sec  
115 rpm  
75% HR

**INTERVAL**  
15sec  
110rpm  
78% HR

**INTERVAL**  
20sec  
105rpm  
80% HR

**INTERVAL**  
25 sec  
100rpm  
82% HR

**INTERVAL**  
30sec  
95rpm  
84% HR

**INTERVAL**  
35sec  
90rpm  
85% HR

**INTERVAL**  
40sec  
85rpm  
86% HR

**INTERVAL**  
45sec  
80rpm  
87% HR

**INTERVAL**  
50 sec  
75rpm  
88% HR

**INTERVAL**  
60sec  
70rpm  
89% HR

**INTERVAL**  
50 sec  
75rpm  
88% HR

**INTERVAL**  
45sec  
80rpm  
87% HR

**INTERVAL**  
40sec  
85rpm  
86% HR

**INTERVAL**  
35sec  
90rpm  
85% HR

**INTERVAL**  
30sec  
95rpm  
84% HR

**INTERVAL**  
25 sec  
100rpm  
82% HR

**INTERVAL**  
20sec  
105rpm  
80% HR

**INTERVAL**  
15sec  
110rpm  
78% HR

**INTERVAL**
